After Care Information

Please aim to remove any dressing after a two hour period and give your new tattoo a good wash with warm fragrance free mild soapy water (using your hands only, no sponges, clothes etc) Carefully pat dry with a clean towel and leave to dry out for the first night.

From the next morning clean your tattoo as you normally would in the shower using fragrance free soap or shower gel again only using your hands before carefully patting dry with a clean towel. With clean hands only carefully apply after care cream* onto the tattooed area 2-3 times daily for 7-10 days.

*your artist will advise which after care product is best for you to use. For more information please check out the black hope tattoo website.

For best results while healing please do not:

- Re-cover with any dressings

- Avoid unnecessary touching, scratching or picking of the tattooed area
- Use any other creams than suggested by your artist
- Avoid swimming, sun beds and sun bathing until tattoo is fully healed
- Shower rather than bathe each day

We'd like to take this opportunity to thank you for being tattooed by us and invite you to leave a review of your experience. Please remember for any upcoming news and recent work visit our website or check out our Instagram and facebook pages.

Thanks again

The Black Hope Team.
